### SUMMARY

---

Senior software engineer with 7+ years delivering fintech, property-investment and SaaS applications. Specializes in React, Next.js and TypeScript, with full-stack experience across Node.js, PostgreSQL and AWS serverless services. Led frontend teams of three engineers, improved conversion and web performance with measurable results, and shipped payment and cross-border transfer experiences. Proven collaborator in international remote teams.

### TECHNICAL SKILLS

---

- **Languages:** TypeScript, JavaScript, SQL
- **Frontend:** React, Next.js, Vue, Svelte, Vite, Tailwind CSS, design systems, i18n, web performance
- **State & Data:** TanStack Query, Zustand, Redux, Prisma, PostgreSQL
- **Backend & Cloud:** Node.js, Express, REST APIs, AWS Lambda, API Gateway, EventBridge, S3, SST v3, Docker
- **Quality & Delivery:** Jest, Vitest, React Testing Library, Cypress, Lighthouse CI, Sentry, LaunchDarkly, Git

### PROFESSIONAL EXPERIENCE

---

#### PropHero — Senior Full-Stack Software Engineer

January 2026 – Present · Spain · Remote

- Delivered investor portal features spanning property discovery, checkout and contract flows using **React 19, TypeScript and Vite**, with Auth0 role-based access, English/Spanish localization and LaunchDarkly feature-flagged releases.
- Built end-to-end purchase journeys connecting the investor interface to **Stripe payments and DocuSign e-signatures** through platform microservices and AWS EventBridge workflows.
- Extended the shared design system (@prophero-ds) with Figma-aligned tokens and reusable React components, keeping the investor portal and backoffice consistent and faster to build.
- Applied Cursor and Claude for spec-to-code delivery, cross-repository changes, tests and refactoring across 20+ TypeScript monorepos.

#### MyConnect.ai — Senior Frontend Engineer (Contract)

June 2025 – October 2025 · Miami, USA · Remote

- Led three frontend engineers in upgrading React projects to the latest versions, and shipped new platform features with **React, Next.js and TypeScript**.
- Implemented Sentry monitoring and structured error-tracking workflows, reducing mean time to debug production issues by approximately **50%**.
- Improved the marketing landing page's performance and SEO, and resolved critical bugs to strengthen platform reliability.

#### Flip — Software Engineer II

June 2022 – February 2025 · Jakarta, Indonesia

- Revamped registration and verification flows, increasing conversion from **33% to 43%**.
- Led three frontend engineers in migrating the B2B website from a legacy React SPA to **Next.js with SSR/SSG**, improving Lighthouse performance scores by more than 40%.
- Optimized Core Web Vitals (CLS, LCP, INP), achieving a Lighthouse performance score of **90+** and contributing to a **25% increase in organic traffic** over six months.
- Delivered the International Transfer feature with full i18n across 5+ locales, supporting thousands of cross-border transactions monthly.
- Integrated Lighthouse CI into the CI/CD pipeline; reviewed production-bound changes and delivered internal engineering talks.

#### Flip — Software Engineer

July 2021 – June 2022 · Jakarta, Indonesia

- Developed and maintained features for Flip for Business, the company's B2B service, and initiated its dashboard migration to TypeScript.
- Introduced Cypress end-to-end test automation and wrote automated tests for critical user flows.

- Improved the shared UI component library to new design standards and collaborated closely with designers and product managers on usability and technical feasibility.

### **Codemi — Frontend Engineer**

*April 2019 – June 2021 · Yogyakarta, Indonesia*

- Built a reusable, Google Forms–style form builder as modular React components and state machines supporting dynamic form creation.
- Developed survey features using XState and contributed knowledge-sharing sessions with fellow engineers.

### **Javasigna Intermedia — Frontend Developer Intern**

*November 2017 – January 2018 · Yogyakarta, Indonesia*

- Built a responsive e-money dashboard with Vue.js and Vuetify, integrating Firebase authentication and the company's backend APIs.

## **SELECTED PROJECTS**

---

### **Artikel Islam** · Flutter, Node.js, TypeScript

- Independently built and released an Islamic-articles mobile app, reaching **10,000+ downloads** and a **4.7-star rating**, with supporting backend and content-processing services.

### **AI Wallpaper Generator** · Next.js, TypeScript, Supabase, Prisma, AWS S3

- Full-stack AI wallpaper platform with Google OAuth, a credit system, [OI] integration and S3 storage.

## **EDUCATION**

---

### **Bachelor of Computer Science — Universitas Islam Indonesia**

2014 – 2018 · Cum Laude · GPA: 3.71/4.00

## **LANGUAGES & CERTIFICATION**

---

- **English:** IELTS Overall Band 7.0 (October 2025) · **Indonesian:** Native
