Professional Experience

Flip.id (*Financial Tech Company*)

Jakarta, Indonesia

Software Engineer - Full-time

July 2021 - February 2025

- Led front-end architecture and SEO optimization using **Next.js** for Flip's B2B site.
- Drove a **100% TypeScript migration**, significantly reducing runtime errors.
- Integrated **Lighthouse CI** into GitLab pipelines, achieving 90+ scores across web vitals.
- Built modular UI components and maintained a **design system** in collaboration with design teams.
- Developed E2E and unit tests (**Cypress**, **Jest**) to ensure reliability across critical user flows.
- Collaborated with designers and backend developers in Agile sprints to deliver user-focused features.
- Conducted code reviews and managed deployments for smooth, timely releases.

 **Stack:** React, Next.js, Redux, Tailwind, Cypress, Styled-components, Micro-frontend.

Codemi Global (*E-learning Company*)

Yogyakarta, Indonesia

Frontend Engineer - Full-time

April 2019 – June 2021

- Developed and maintained core features for Codemi's e-learning platform, improving overall usability and learner engagement.

- Built a custom form builder tool inspired by Google Forms, enabling users to create dynamic, interactive forms without coding.
- Designed and implemented a survey feature to support feedback collection and training assessments, enhancing the platform's data capabilities.
- Collaborated with designers and backend engineers to ensure seamless integration and responsive UI across various screen sizes.

🔧 **Stack:** React, Mobx, Redux, Xstate, Bootstrap, Emotion.

Javasigna Intermedia (Software House)

Yogyakarta, Indonesia

Frontend Developer - Internship

November 2017 – January 2018

- Developed a responsive dashboard interface to display users' e-money balances, improving data visibility for end users.
- Integrated Google Authentication via Firebase to ensure secure and reliable user login.
- Built UI components using Vue.js and Vuetify, accelerating development with a clean and consistent design system.

🔧 **Stack:** Vue, Vuex, Vuetify, and Firebase.

Personal Projects

AI Wallpaper Generator

November 2024 – February 2025

A web platform for AI-generated wallpapers using OpenAI APIs, supporting login, image sharing, and AWS S3 storage.

🔧 **Stack:** TypeScript, Next.js, TailwindCSS, Supabase, Prisma, AWS Amplify, OpenAI

🌐 aiwallpapergen.com

Artikel Islam

January 2021 – December 2021

A mobile reading app built with Flutter, TypeScript, and Node.js, allowing users to access Islamic articles from authentic sources. The app has been downloaded over 10k times and maintains a 4.7-star rating.

🔧 **Stack:** Dart, Flutter, Node.js, TypeScript, Express.js, Cheerio.js, Netlify.
